Forecast for Monday 21 Dec 2020

Weather: Overnight showers mainly focused in the south and west, with snow level 900-1000m. Cloudy with showers or longer periods of snow and rain through the morning and afternoon. Heaviest most persistent outbreaks expected from Ben Nevis south and westwards from mid-morning to mid-afternoon, bringing a chance of hail and thunder to coastal ranges. Snow level around 900m lowering 500-600m from late afternoon as it turns drier from the west, with scattered showers through the evening, again mainly focused across southern and western peaks.

Chance of cloud free mountain/hill tops above 800m: By day 15% in southwest and 50% in northeast with bases lowering 500-700m, sporadically in and around showers and more generally in the longer periods of snow and rain.

Visibility: Good lowering to a handful of kilometres in showers or longer periods of snow and rain.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View
Potentially hazardous conditions, particularly in the south and west, where hill fog, severe wind chill and summit snow will be quite extensive.

Forecast for Tuesday 22 Dec 2020
Weather: Sunshine and showers, these ranging from isolated around the Great Glen and occasional across western coastal ranges, with snow level 700m lowering 400m by evening.

Maximum wind: West to southwest mean 20mph gusts 30mph easing gradually from mid-day.

Chance of cloud free mountain/hill tops above 800m: Ranging from 75% in west and 90% in the Great Glen with bases sporadically lowering 500-700m in and around showers.

Visibility: Very good lowering to a handful of kilometres in showers.

Temperature: **Glens:** Plus 1 Celsius increasing 8 Celsius for a time during the afternoon
At 800m: Zero Celsius lowering Minus 3 Celsius by early evening
Freezing level: 800m lowering 500m by early evening
